📊 CodeForces

PROFILE

High-performing Computer Science graduate (GPA 3.7/4.0) with a strong foundation in algorithms and competitive programming. Passionate Flutter Developer with hands-on experience building AI-powered mobile applications and rapid prototyping in hackathon environments. Skilled in Dart, State Management, and API integration, with a proven track record of teaching complex technical concepts.

PROFESSIONAL EXPERIENCE

Technical Support Engineer

dPhish 

05/26 – Present
El-Sheikh Zayed, 7th
fistrict

- **Technical Integration:** Configure and support email add-on integrations across various enterprise infrastructures (Cloud & On-Premises Exchange).
- **Issue Resolution:** Troubleshoot LMS reporting discrepancies and analyze system logs to verify sender reliability and accurate simulation tracking.
- **Platform Administration:** Manage user onboarding, administrative access control, and portal configurations for internal teams and corporate clients.
- **Client Success:** Assist regional enterprise clients with deploying localized phishing simulation campaigns and deliver technical training support.

Technical Support (English) – Comcast Account

Sutherland Global Services

09/2025 – 02/2026
Cairo

- Provided customer support for Comcast clients via inbound calls.
- Ranked among the top agents on the floor for **sales performance** and **high NPS scores**.
- Resolved billing, technical, and account issues while meeting KPI targets.

ERP & SAP SuccessFactors Tools Developer | MindLabs

- Developed automation tools using **Python** to streamline HR tasks within SAP SuccessFactors, significantly reducing manual effort.
- Implemented role management and permission replication via **OData APIs**.
- Automated complex reporting and Excel exports to enhance operational efficiency.

02/2025 – 06/2025

Coding Instructor

Ischool 

08/2023 – 09/2024
Remote, Egypt

- Through my experience i taught +50 students computer science and programming and some technologies like web development and mobile apps.

Competitive Programming Participant

CPC Competition (3 editions)

2022 – 2024
Alexandria, Egypt

- Participated in CPC competitions three times, sharpening problem-solving, algorithmic thinking, and coding efficiency under time pressure.

EDUCATION

Bachelor's in Computer science

Misr University for Science and Technology

GPA: 3.7 / 4.0

10/2021 – 06/2025
6th October, Giza

Cisco Certified Network Associate (CCNA) Modules 1 & 2

Cisco

Remote

Extensive hands-on lab work configuring Cisco networking hardware and optimizing traffic flow.

IPv4/IPv6 Addressing, Subnetting, VLANs, Routing Protocols (OSPF), DHCP, and Network Security Fundamentals.

Competitive Programming

Coach Academy

Topics: Competitive programming, Data structures and Algorithms

06/2021 – 09/2021

Remote, Egypt

Software engineering training

Africa to Silicon Valley [↗](#)

Learning data structures, competitive programming, and software engineering patterns to strengthen problem-solving and development skills using Python.

01/2024 – 02/2025

Remote, Ethiopia

PROJECTS

Lupira App | Flutter, Node.js, MongoDB [↗](#)

2024 – 2025

Graduation Project & Published Research Paper

- Developed a **Flutter mobile application for early lupus (SLE) detection**, analyzing user symptoms and laboratory results based on established clinical criteria.
- Implemented **authentication, questionnaires, result history, profile management, Arabic/English localization, RTL support, and deep linking**.
- Integrated the app with a **Node.js REST API and MongoDB backend** for user accounts, questionnaire data, and detection results.
- **Co-authored and published research** [↗](#) on the project, achieving **96.95% accuracy** in SLE detection.

Recipe App | Flutter [↗](#)

07/2026 – 07/2026

Personal Project | 2026

- Developed a **recipe application using Flutter and Clean Architecture**, separating Presentation, Domain, and Data layers for a scalable and maintainable codebase.
- Integrated **REST APIs using Dio** to retrieve recipes, categories, recipe details, and user data.
- Implemented **authentication, recipe search, dynamic filtering, favorites, and shopping cart** functionality.
- Applied **Provider for state management and GetIt for dependency injection**, following reusable and testable architecture patterns.

Food Delivery App | Flutter, Dart [↗](#)

08/2026 – 09/2026

Personal Project | 2026

- Built an end-to-end food delivery app with **20+ screens and 10 features**, integrated with a live REST API using **Dio**.
- Applied **MVVM + Cubit** and feature-first architecture with Repository pattern for scalable code organization.
- Implemented authentication, restaurant/menu browsing, search, cart, checkout, address/payment selection, and order management.
- Added **secure token storage**, custom Dio interceptors, English/Arabic localization with RTL and ICU plurals.

ISupply Flutter Hackathon | Mobile App Prototype | Flutter

06/2025 – 06/2025

Individually built and fixed a mobile app prototype under time constraints using Flutter, with focus on API integration, state management, and UI/UX.

Bus Reservation System [↗](#)

11/2022 – 02/2023

Built a bus reservation system using C++ applying OOP, data structures, and algorithms. Features included booking, cancellation, and seat display using arrays, linked lists, and file handling.

Hotel Management system [↗](#)

09/2021 – 01/2022

Developed a hotel management system using C++ with arrays and linked lists for room booking, check-ins, and billing. Used algorithms to optimize room allocation and data retrieval.

SKILLS

Mobile Development:

Flutter, Dart, Android Studio, REST APIs, Dio, JSON Parsing & Model Mapping, State Management (Cubit, Provider), MVVM, Clean Architecture, Dependency Injection (GetIt), Authentication, Secure Storage, Localization (English/Arabic), RTL Support, Navigation & Routing, Form Validation & User Input Handling, Error Handling & Loading States, Git & GitHub

Core Concepts

Data Structures, Algorithms, OOP, Database Management, Problem Solving, REST API, Network, Networking, TCP/IP, LAN/WAN, Routing, Switching

Languages:

C++, Python, SQL, HTML, CSS, Dart.

Tools:

VS Code, CLion, Git, GitHub, Android Studio, SAP Success Factors, Word, Excel, Power Point, Swagger

LANGUAGES

Arabic — Native/Bilingual

English — Fluent
